NATURE SCAVENGER HUNT

Did you know there are over 1.5 million living animal species? The study of animals is called zoology.

Photo: Mark Rivera | Audubon Photography Award

Can you find each of these things?

When you do, write down its name or its description. The one who finds the most, wins!

1. A plant or tree that stays green all year.
2. An animal that pollinates flowers.
3. A seed built to float in the wind.
4. A seed built to grab onto an animal's fur.
5. An insect home.
6. An animal that eats dead things.
7. An animal that lays eggs in water.
8. An animal that lives on land *and* in water.
9. Animal tracks, scratch marks, feathers or other sign an animal was here.
10. An animal that's camouflaged.
11. An animal that is hunting for food.
12. A dead tree (snag) that is providing a home for an animal
13. Something that is decomposing.
14. A source of water for animals.
15. Piece of trash/litter that you can remove and properly dispose of.
16. A trail marker or sign.
