After

Improved habitat

Small efforts make big impact....

A scenic landscape featuring a herd of cattle grazing in a field. In the background, there are several trees with sparse foliage and a range of mountains under a hazy sky. The overall tone is soft and natural.

“

“Working with a diverse group of people toward shared goals has been so rewarding for us. As cattlemen, we have seen improved forage and a reliable water source that have had amazing benefits assisting us in our herd and forage management practices.”

Land and Livestock Company

-Ken McMurry, McMurry
